

Product Information

3-(Acetylthio)propionic acid *N*-succinimidyl ester

Cat. No.: X24-09-YYX115

Size: 100 mg

CAS Number: 84271-78-3

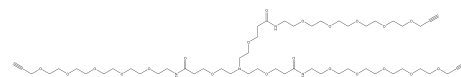

PubChem CID: 4110341

Synonym: 84271-78-3; *N*-Succinimidyl-S-acetylthiopropionate;

2,5-DIOXOPYRROLIDIN-1-YL 3-(ACETYLTHIO)PROPANOATE;

3-(Acetylthio)propionic acid *N*-succinimidyl ester; (2,5-dioxopyrrolidin-1-yl)

3-acetylsulfanylpropanoate

This product is for research use only and is not intended for diagnostic use.

Product Information

Description	3-(Acetylthio)propionic acid <i>N</i> -succinimidyl ester combines an acetylthio group and a succinimidyl ester. It is frequently used in bioconjugation reactions to attach thiol-containing molecules to other biomolecules or surfaces. The succinimidyl ester provides a reactive site for coupling reactions.
Molecular Weight	245.3
Molecular Formula
