

Product Information

Folate/Hydroxyl PEG reagent, Folate-PEG-OH, MW 3,400, Purity ≥95%

Cat. No.: X25-10-YM146

Size: 50 mg; 100 mg; 250 mg; 500 mg

Synonym: Folate-PEG-OH

This product is for research use only and is not intended for diagnostic use.

Product Information

Description	Folate-PEG-OH is composed of the functional groups folate and hydroxyl, and reactive groups include acid and thiol.
Functional Group 1	Folate
Functional Group 2	Hydroxyl
Reactive Group 1	Acid
Reactive Group 2	Thiol
Form	Solid/liquid
Purity	≥95%
Impurities	No visible impurities to the naked eye.
Identity	Confirmed by NMR.
Applications	Folate-PEG-OH can be studied extensively for its ability to modify surfaces for enhanced biocompatibility and reduced protein adsorption.
Storage	Store at -20°C.
